

OOW: Open Source Exec Panel

Audience Q&A

Didn't say it was better, just said it was "a good way."
Wants to know positive differences of doing OSS
[open source isn't a sort of exclusive model]
wide-spread skills
collaboration across [The Network]
open source will continue to evolve
open data
open APIs
Oracle will use whatever [development methodology] that sells
Oss is a good way of developing software? Why is it better?
Olson followups after next question
Sells dual license
gives people assurances
Olson
Oracle pursuing some monetize OSS model?
Someone wants "soft-copy" of presentation
Show to organization that OSS is real
wide spectrum of OSS
clarification
rubs up against heterogeneous approach
[But not specifically] In part...
The only way to get support is a subscription fee
Compared to Oracle, it's "pretty comparable" MySQL
"smooth" scaling up Also you have the onramp
for free Response to customer desire Monica
Separate distro or what? What is unbreakable Linux?
they're not from the apps group
says Salesforce is low-end
[the "we're better" argument] doing business process is difficult
Is Oracle XE designed to meet the competition from OSS?
MySQL
Also you have the onramp
Response to customer desire
Monica

Wrap-up

"Oracle embraces and supports a variety of open source projects, including Linux, PHP, Eclipse, Apache, Berkeley DB."
"Contributes open source code."
Tests and optimizes open source to work well in enterprise environment
Oracle is committed to open source
Oracle is using and working with stuff
integrating with BugZilla Testing
oss.oracle.com
otn.oracle.com/linux
Monica.kumar@oracle.com
More info!

Free products

Oracle free for dev
free "full featured"
download
dev
production
distribution
free for
formally known as HTML DB
Uses Application Express

Oracle's OSS Involvement

Certify & Interoperate
Integrate & Extend
Contribute & Enhance
3 themes
BPEL
"hot-plugable with open source" Fusion Middleware
Used by Glassfish
Toplink Essentials is the ref impl
EJB 3
donated by Oracle...?
in incubation
Apache Trinidad
JSF
Spring
Struts
Tapestry
xdoclet
httpd
Perl
Hibernate
JUnit
Rails
Ant
Eclipse
They list all the hot JEE OSS projects
you get Toplink Essentials if you download Spring 2.0
Spring
"religiously adhere to standards"
"the 'hot-plugable' word is not [just] a buzzwork" it's technologically real
Certifying and Integrating things
dev teams are separate and do not coordinate
JDeveloper is better, all around for, enterprise development
we just don't want to leave them behind
"for a variety of reasons, some people choose to use Eclipse"
exemplifies providing choice Moderator
not a single dev on team has been moved
[As an Eclipse plug-in...ho, ho...]
JDeveloper is going to be around for awhile
We're not killing JDeveloper
PHP development too
JDeveloper available for free and free use

Meta

Late because I couldn't find the room
Ken Jacobs, Oracle; Omar Tazi, Oracle;
Monica Kumar, Oracle; Mike Olson,
Oracle; Christopher Jones, Oracle
People

InnoDB

Missed due to lateness

PHP

pre-built PHP stack jointly developed with Zend and Oracle
Why should people use Oracle?
depends on skills of people
what do you want to use?
starting to see people come into PHP
RAC to scale with RAC in the backend
What is PHP uses for? Enterprise?
Oracle tends to see the bigger sites.
Oracle Express
Yahoo! Speaker talk on how they're using PHP and Oracle

BerkeleyDB

Mike Olson
200M copies being used
used everywhere Sendmail
the usual list of BerkeleyDB uses
dual licensing
ORCL didn't need to buy for DB
biz model
Sleepycat brought
address a different part of market
because BerkeleyDB is different
network edge apps
mobile apps
edge apps store data reliably
store and forward
Margo and Mike are still at ORCL as is rest of dev team
done 2 releases more stuff in the pipeline
Who are the customers?
Many big names Sun
Google
Cisco
BerkeleyDB is mission critical, decades proven
customers not using it for "toy applications"
"Strong Open Source Reputation"
Open source...? BerkeleyDB is premier OSS db build for apps that need storage but not queries
